## A new interface and easier navigation

One of the biggest changes to Webi is the new interface. It's inspired by Desjardins Insurance's new graphic standards and has a more streamlined look. Webi has also been adapted for use with mobile devices.

We've grouped products by type to make navigation even easier! You'll now find everything about insurance under a single tab. So, if you want insurance product information, sales materials, sample contracts, rates and returns, and more, you just need to look in one place. The same goes for our investments products.

## Powerful search engine

Looking for something specific or don't know your way around Webi? With the new search engine, it's easy to find the information or forms you need. You can even apply filters to narrow your search!

**NEW!**

## Home page app bar

We've converted the old Webi's Direct Access section into an app bar on the home page. When you're not on the home page, the app bar turns into an icon (  ).

The applications that will be posted are those related to your user profile.

## Better content segmenting

The new Webi lets us segment content by network and now, by user profile (advisor, administrative staff, manager, etc.).

We'll still be publishing news items on the home page, but some of them will now appear in a coloured box so they stand out.
